SKILLS

Ruby

Ruby on Rails

JavaScript

Git

HTML5/CSS

RSpec / Minitest

Heroku

PostgreSQL

Linux

PROJECTS

Trike World Limited Website (09/2019 – Present) [🔗](#)

- Fully responsive web application created for the purpose of advertising client's V8 trike motorcycle business, Trike World Ltd.
- Primary technologies include Rails 6, Bulma CSS Framework, PostgreSQL RDBMS, and Heroku hosting platform.
- Application features a custom authentication system, custom photo-centered blogging system, and thorough unit and integration tests with Minitest.

Personal Portfolio Site (09/2019 – Present) [🔗](#)

- Website to advertise personal projects and developer skills.
- Built using Rails 6, Bulma CSS, hosted on Heroku.
- Implemented Google's reCAPTCHA v2 API in contact form to prevent spam messages.

Command-line chess (05/2019 – 07/2019) [🔗](#)

- Two-player command-line game of chess.
- Written in Ruby, features RSpec unit testing.
- Features such as chess piece interactions and win conditions required the use of concepts such as object-oriented programming and algorithms.

OPEN SOURCE CONTRIBUTIONS

Open Source Contributor

The Odin Project [🔗](#)

03/2019 – Present

Open-source web development curriculum

- Made improvements to content of curriculum via pull requests to The Odin Project source code.
- Gave technical support and assistance to other students working through curriculum.

EDUCATION

Biochemistry, Molecular and Cellular Biology

University of Arizona

08/2015 – 12/2017

Tucson, AZ

WORK EXPERIENCE

Server

Ghini's French Caffè

02/2018 – 07/2018

Tucson, AZ
